New cost-effective product choices by ILCO

Generation 790

Generation 770

Generation 760

Introducing the new ILCO range of cost-effective electronic locks that have been brought into the Southern African hospitality market by Saflok SA - an established leader in state-of-the-art electronic locking systems, access management systems and in-room safes for the hospitality, commercial and government markets.

In the diverse hospitality security industry, different segments demand their own unique solutions. To this end, Saflok SA is committed to delivering the best-in-class locking solutions that help properties achieve improved operations at reduced costs.

Generation 790

The ideal solution for hoteliers wanting the ultimate in security and operational efficiency. Guests present their keycards to the lock reader to gain access. Staff keycards carry audit information permitting security personnel to track their movements.

Generation 770

Enhance the security and elegance of your hotel with the ultimate door lock, engineered for reliability and designed for style.

Generation 760

Simple, secure and the best market value in its class. The Generation E-760 stand-alone lock is designed to meet the challenging and diverse needs of the hotel industry.

Front Desk Unit

The Front Desk Unit (FDU) accelerates the check-in process and reduces training time as one of the most user-friendly access control systems in the industry. The FDU is the stand-alone brain of the system which encodes keycards, programmes and audits the locks with no need for a separate computer or database. It not only remembers what keycards were issued, but also who issued them!

The FDU is ideal for smaller facilities in need of single or multiple workstation applications. The compact FDU is stand-alone, meaning it requires no wiring and no computer... with a small footprint, it takes minimum front desk space.

Saflok Messenger

Existing clients of Saflok SA will be pleased to know that the new range of ILCO electronic locks also interacts with the Saflok Messenger wireless communication network.

Saflok SA

Their Security. Your Control.

For more than 30 years, managers of small, medium and large hospitality establishments across Southern Africa and the Indian Ocean Islands have relied on Saflok SA to provide security solutions that meet the ever-changing needs of the hospitality industry. Saflok SA is their partner in electronic and access control solutions.

To efficiently service this diverse customer base, Saflok SA generates solutions based on the company's experience, stability and depth of resources - allowing property owners of hotel groups, boutique hotels, lodges and guesthouses to achieve greater security, efficiency and flexibility in their daily operations.

Saflok SA has an experienced team of designers and engineers that create customised applications by using the latest technology to bring value to their clients.

Service Support

At the same time, Saflok SA understands the critical need for their customers to get immediate technical assistance. To this end, technical experts are available 24 hours a day, seven days a week and 365 days a year... to give you the support when you need it!

A premium portfolio of clients

Saflok SA offers a diverse collection of electronic locks and related accessories that combine revolutionary technology with innovative design and functionality.

Saflok SA would like to take this opportunity to thank its local and international clients for their valued support over the years:
