

The non-volatile FLASH memory **(C)** stores over a year's worth of lock data (or up to 5,900 entries) providing detailed audit-trail information such as date and time of the entry as well as the ID code of the employee or guest using the keycard.

The MT Lock is easy to use and works with SAFLOK System 6000, Innkeeper and Passport front desk systems.

The MT lock's battery pack is welded and insulated to ensure uninterrupted power. If the battery power **(D)** is running low it will alert you months in advance by displaying a red light when a keycard is inserted. This gives you ample time to replace the battery. During the change-out, the programming and audit trail information remains intact.

Another benefit of the MT lock is that it is easy to upgrade without changing or removing hardware. New software features can be easily uploaded when desired upgrades become available.

### **Automatic and Keycard Activated Latch**

The MT lock can be programmed to lock and unlock at certain times of the day, allowing entry during "passage" hours and relocking during secure hours.

The Passport System also supports manual latching/unlatching functionality.

This feature makes the MT lock ideal for perimeter, meeting room and amenity area doors.

### **Optional Automatic Deadbolt (ADB™)**

The SAFLOK automatic deadbolt **(E)** features a two-point locking system. The 5/8" dead locking latch **(F)** and 1" steel reinforced deadbolt **(G)** activates every time the door is closed providing increased protection against forced entry.

### **Optional Communication Technology**

This feature, only available with the SAFLOK System 6000, enables the MT lock to become part of a centralized access control system and interface with energy management systems. This is available for both Messenger and Inncom Systems.

### **SAFE and Secure with SAFLOK**

SAFLOK understands the critical needs of today's property managers, so when you partner with SAFLOK, you receive direct service from initial sales to aftermarket support. No middleman. Our technical experts are available 24 hours a day, seven days a week, to give you the support you need, when and if you need it.

A worldwide leader in the development and manufacturing of security systems, SAFLOK has the experience, stability and depth of resources to help you achieve increased security, efficiency and flexibility in your daily operations.
